

BUILD YOUR NEXT CHAPTER

\$100 SELF-PACED ACTION PROGRAM

Not motivational filler. This is a working system: decisions, experiments, AI-assisted execution, weekly reviews, and a 90-day roadmap.

Use it in order. Write in it. Repeat pages when life gets messy. The goal is not to look productive - it is to build proof.

MODULE 1 - THE REAL INVENTORY

Separate facts from the story you tell yourself about them.

What is objectively true about my situation?

What am I assuming this says about me?

What costs me the most time, money, energy, or opportunity?

What asset, skill, resource, or relationship can I build from?

MODULE 2 - A 90-DAY EXPERIMENT

Choose a direction without demanding a permanent identity decision.

My 90-day experiment is...

What evidence should exist by day 30?

What should improve by day 60?

What result by day 90 tells me continue, adjust, or stop?

MODULE 3 - YOUR STARTER SYSTEM

Design for the real you - including tired, distracted, and imperfect weeks.

My minimum weekly action is...

My bad-week version is...

The friction I can remove is...

My accountability method is...

MODULE 4 - AI AS YOUR FREE STARTER TEAM

Use AI as brainstormer, organizer, tutor, practice partner, and critic while you remain the decision-maker.

THE SECRET SAUCE: Get acquainted with AI by using it on something real. No experience is required to ask a question, test an answer, refine it, and act. Start free; build skill before buying complexity.

Ask AI to interview you before advising.

Ask for a beginner plan using free resources.

Request specific critique of a draft.

Role-play an interview, customer, collaborator, or conversation.

Reduce an overwhelming plan to three actions.

MODULE 5 - SKILL BEFORE STATUS

Practice before worrying about titles.

What skill would make my goal easier?

What can I practice for 20 minutes?

What sample can I create before anyone hires or buys from me?

Where can I get useful feedback?

MODULE 6 - THE 30/60/90 ROADMAP

Turn your experiment into milestones and review dates.

30-day milestone

60-day milestone

90-day milestone

Weekly non-negotiable

What I will measure

What triggers an adjustment

MODULE 7 - THE RESTART PROTOCOL

Missing a week is not a reason to invent a new life plan.

What happened - facts only?

What still matters?

What can be dropped?

What is the smallest useful action today?

When is my next review?

MODULE 8 - THE NEXT-CHAPTER REVIEW

Make the next decision from evidence.

What proof did I create?

What produced results?

What was noise?

What did I learn?

What is my next 90-day experiment?

WEEKLY REVIEW - REUSE THIS PAGE

What did I finish?

What actually moved the goal?

What looked productive but was not?

My three actions next week:

What should I ask AI to help me think through?

YOUR PERSONAL AI PLAYBOOK

Save prompts that actually help. Better context usually creates more useful output.

My best planning prompt:

My best learning prompt:

My best restart prompt:

BUILD PROOF, NOT A PERFORMANCE

You are allowed to be a beginner. You are allowed to use free tools. You are allowed to start before anybody is impressed.

For the next 90 days: choose deliberately, act consistently enough to learn, use AI intelligently, verify important information, and make the next decision from evidence.

Educational coaching content. No guarantee of income, employment, business success, health outcomes, or other specific results.
